Masdisin

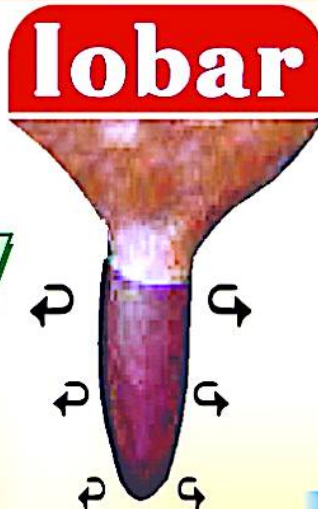

Ready to use
iodine barrier

**Pre and post
milking dip**

**5500PPM ACTIVE IODINE
PRE AND POST MILKING DIP**

Masdisin lobar is a post milking disinfectant which kills fungus and bacteria that cause mastitis with 0.55% active iodine.

Masdisin lobar is a ready to use solution for post milking. No need to mix it with water and it can be applied using a teat dip container.

Predip Usage:

Masdisin lobar can be used as pre dip, for pre dip usage dilute with 1:2 with water and dip teats. Wipe with towel or tissue before milking.

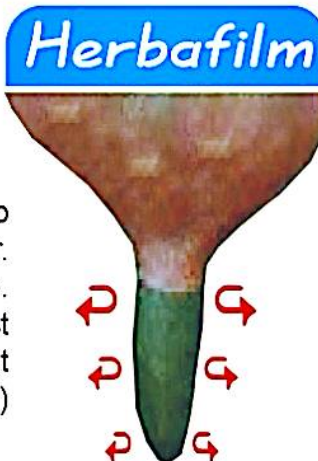

**Ready to use
Teat Dip**

Masdisin

4 Season

Masdisin Herbafilm Usage

Herbafilm is ready to use solution, no needs to dilute. Before use just shake the container. Very wet teats must be dried before use. You need wait 10-15 min until the product dries after dipping teats and you should not wipe it after immersion (or sprayin)

Masdisin Herbafilm Benefits:

Natural fast acting LANA technology: Patented LANA (Lactic Acid, Natural Activation technology) technology has a wide range of effects on microbes. It should be noted that Masdisin Herbafilm prevents the emergence of new mastitis cases but does not treat mastitis.

Masdisin Herbafilm is 4 seasons ready to use teat dip. It creates an antiseptic film on the top of the teat and prevents the bacterial into the udder.
